

## Outsourcing Services

Creel Solutions has a vast pool of experienced IT professionals that can meet virtually any IT outsourcing need. Our core competency is in application development and support but our talented consultants handle a full range of services including systems analysis, data entry, project management, networking and technical support.

## The Nearshore Advantage

As nearshore outsourcing has become a greater part of organizations' outsourcing strategies, Canada has become the ideal location for outsourcing providers. With a very similar culture and legal system to the US and close proximity to major US markets, Canadian outsourcing providers are able to provide high quality, low cost, low risk outsourcing solutions.
